

Project Name: Calendar

Project by: Nandini Patel and Het Patel

Course: COMP 4400

Proposal

We aim on developing a calendar application. This calendar application records the tasks that the user has entered. The user will be entering tasks by providing a day, date, and the task. All the tasks will be stored in a text file. The user can request to view all their tasks, see their tasks on a specific day, and other similar functions.

PL Paradigm

Logical programming: Prolog
